

Sara Farkash | Full Stack Developer

0583296900 | S3296900@gmail.com | [GitHub](#)

Summary |

Full Stack Developer with experience building end-to-end web and mobile applications using **React, React Native, Node.js, FastAPI, PostgreSQL, and Supabase**. Experienced in API integration, **AI-powered features**, automation workflows, data processing, and cloud deployment. Fast learner with system-level thinking, strong problem-solving skills, clean coding practices, and the ability to take ownership of tasks from planning to implementation.

Professional Experience |

2026 – Present | Full Stack / React Developer | TripEase

Technologies: React, React Native, Zustand/Redux, FastAPI, REST APIs, PostgreSQL, Supabase.

- Developed user-facing web and mobile features for an **AI-powered travel planning platform**, including screens for user profiles, trips, preferences, bookings, and documents.
- Integrated frontend flows with **FastAPI backend services** and **REST APIs** for managing core user and trip-related data.
- Managed client-side state using **Zustand and Redux**, including forms, validations, error handling, and responsive UI flows.
- Contributed to **AI-based recommendation** and itinerary-planning features to support personalized trip planning.

2025 | Freelance Full Stack Developer | Content & Analytics Platform

Technologies: React, Node.js, Python, .NET Core, PostgreSQL, Supabase, Docker, OpenAI

- Developed a content and analytics platform for digital content and structured data.
- Built **automation workflows** for files, APIs, and database tables using **Python, Pandas, and Regex**.
- Developed an **OpenAI-based tool** for content analysis, **semantic search**, and **structured outputs**.

Technical Skills |

- **Frontend & Mobile:** React, React Native, Angular, TypeScript, JavaScript, HTML, CSS, Redux, Zustand.
- **Backend:** Node.js, Python, FastAPI, Flask, Java, C#, .NET Core, REST APIs, Web API.
- **Databases:** PostgreSQL, SQL Server, MongoDB, Supabase.
- **AI & Automation:** OpenAI API, AI Agents, automation workflows, data processing, Pandas, Regex.
- **Cloud & DevOps:** AWS S3, AWS RDS, IAM, Render, Cloudflare Pages, Docker, Docker Compose, Multi-Stage Builds, basic CI/CD.
- **Testing & Tools:** Testing & Tools: Postman, REST API testing, Unit Tests, Selenium WebDriver, JUnit, NUnit, GitHub, Bitbucket, Entity Framework, JSON, HTTP Requests, Debugging.
- **Operating Systems:** Windows, Linux.

Education |

2023–2025 | Practical Engineering Diploma (Mah'at), GPA 98

Additional Courses: Operating Systems, Digital Systems, Algorithms, Data Structures & Graph Theory, Technical and Spoken English, Linux OS Management.

Languages |

Hebrew: Native | **English:** Advanced
